Homewood Health

Homewoodlearning.com

- Users engage at their own pace with flexible online learning—from anywhere, and at any time.
- Online modules are designed to provide practical, actionable strategies that employees/leaders can apply immediately.
- Everything needed including content, completion certificates and real-time advanced reporting metrics.

What is it?

Homewood Learning (HL) is a custom learning management system (LMS) that allows employers to easily assign online modules to their employees or leaders.

With a current course on leadership strategies for supporting mental health concerns in the workplace and more courses to be added in future, the platform gives plan administrators access to a robust learning management system **included with the Pathfinder Comprehensive service package.**

Features

- Online modules from Homewood Health's mental health and wellness experts
- Engaging exercises and resources to supplement learning
- Certificates of completion for courses completed
- Interactive quizzes and learning evaluations

Benefits

- Homewood Health is the only EAP provider offering a custom LMS as part of an EAP offering
- External LMS systems may have licensing and maintenance fees that make implementation costly and time-consuming
- Advanced, real-time reporting
- Accessible from anywhere and from any device
